

BioMed Online Learning Courses

Implementing Advanced Quality Management

Plan and manage a quality
management system

Implementing Advanced Quality Management

This 12-week course, starting in April and October, has been designed for:

- biomedical scientists;
- clinical scientists;
- laboratory and hospital managers;
- health service managers;
- nurses;
- pharmacists;
- medical technical officers.

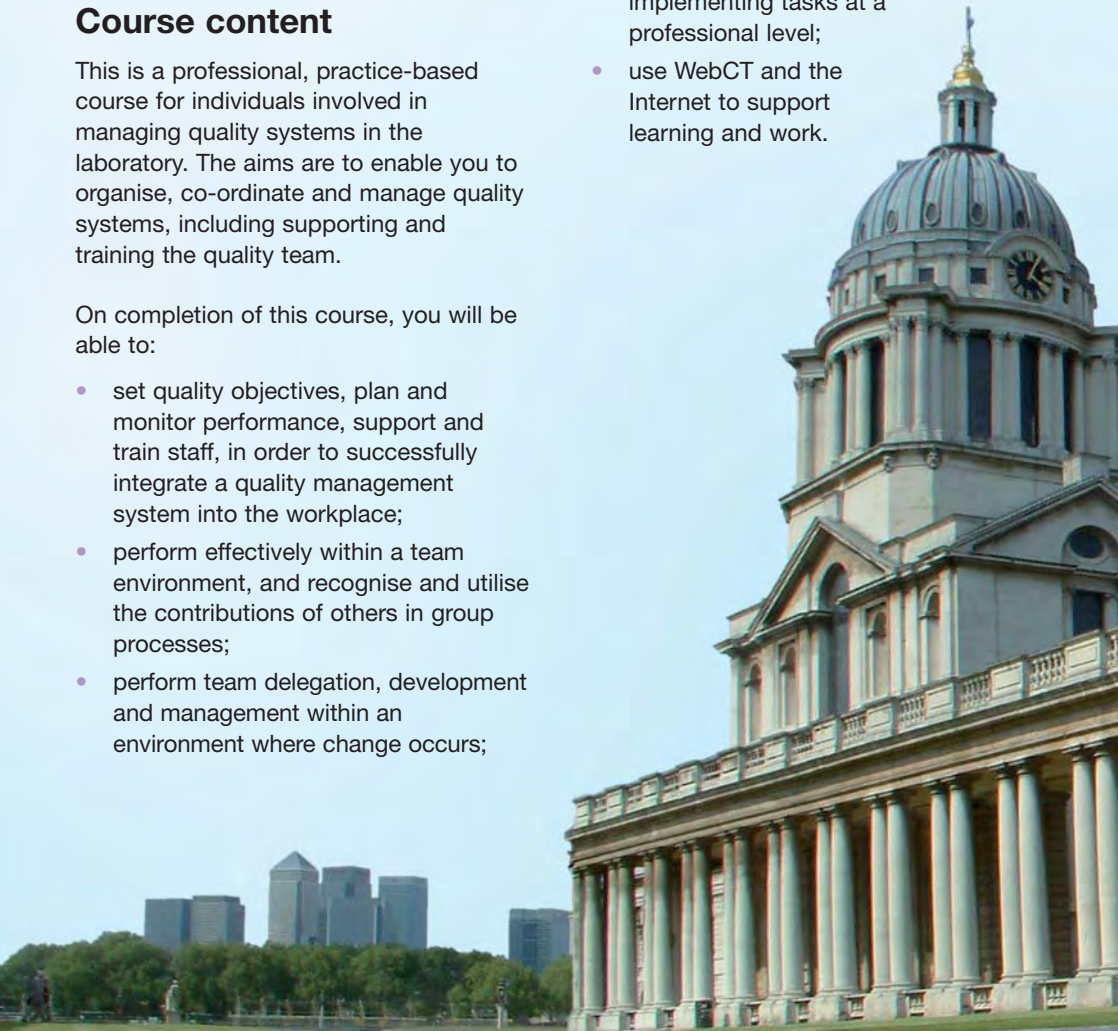

Course content

This is a professional, practice-based course for individuals involved in managing quality systems in the laboratory. The aims are to enable you to organise, co-ordinate and manage quality systems, including supporting and training the quality team.

On completion of this course, you will be able to:

- set quality objectives, plan and monitor performance, support and train staff, in order to successfully integrate a quality management system into the workplace;
- perform effectively within a team environment, and recognise and utilise the contributions of others in group processes;
- perform team delegation, development and management within an environment where change occurs;

- plan and manage your own professional development;
- communicate effectively using a range of media. Prepare strategic plans and reports and listen to, negotiate with, and persuade and influence others;
- demonstrate self-direction and clarity in tackling and solving problems;
- act autonomously in planning and implementing tasks at a professional level;
- use WebCT and the Internet to support learning and work.

Other online courses

- Analysis of Nucleic Acids
- Blood Transfusion (*in development*)
- Diagnosis of Breast Cancer
- Gene Structure and Function
- Lung Disease
- Management of Healthcare Associated Infection
- Point of Care Testing
- Quality Systems Management
- Renal Disease
- Robotics and Automation

We offer

- A high level of student support. Tutor:student ratio of 1:10.
- 100 Continuing Professional Development points from the Institute of Biomedical Science for each course.
- An MSc accredited by the Institute of Biomedical Science – four online courses plus a workplace-based project.
